

Chain Couplings with Casing

Material: Chain wheels made from steel, teeth hardened.
Chain with clip link made from steel.
Casing made from aluminium, yellow painted, with o-ring-seals.

- Elastic transmission of torque.
- Compensation of large shaft misalignment.
- Fast declutching by simply loosening the chain.
- Axial shaft movement is allowed.
- Not for strong shocks recommend.

The chain wheels are pre-bored. Customized bores, featherkeys and setscrew threads against extra charge.
At mounting, the casing has to be filled with grease.
Temperature range: -30°C to +120°C.

Chain Couplings

Material: Steel, with double-strand chain DIN ISO 606 (formerly DIN 8187).

The couplings are delivered assembled or unassembled.
The chain is packed separately. Number of teeth = 18.

- Elastic transmission of torque.
- Compensation of large shaft misalignment.
- Fast declutching by simply loosening the chain.
- Axial shaft movement is allowed.
- Not for strong shocks recommend.

The chain wheels are pre-bored. Customized bores, featherkeys and setscrew threads against extra charge.
Temperature range: -30°C to +220°C.
